Application Title : Barangay Document Management System Offline Version

Project Overview : The Barangay Document Request Management System is a web-based application designed to streamline and automate the processing of document requests from barangay residents. It allows residents to request essential documents such as Barangay Clearance, Certificate of Indigency, and other barangay certifications. The system helps barangay personnel manage, track, and process requests efficiently while maintaining organized digital records. Its goal is to minimize manual paperwork, reduce processing time, and improve the overall delivery of barangay services.

Technology Used:

PHP
LARAVEL
MySQL
Javascript
CSS
AJAX
MODALS
DATATABLES
SELECT 2

Roles:

Clerk
Admin

Project Pages:

Login Page: Allows authorized users and barangay personnel to securely access the system using their registered username and password.

Forgot Password Page: Allows users to reset their password by verifying their registered email address and following the password recovery instructions.

Dashboard : Provides an overview of barangay operations, displaying summarized transactions, total population, document requests, and ongoing transactions to help personnel monitor and manage activities efficiently.

Users : Displays a list of all registered system users and their account information. This page is exclusively accessible to administrators through the sidebar, allowing them to manage user accounts and access permissions.

Transactions Page: Allows barangay personnel to view, manage, and process all document requests, including ongoing and completed transactions. It also provides access to previous transactions for easy tracking and reference.

Staff and Officials Page: Allows administrators to manage barangay staff and officials by adding their personal information, profile pictures, positions, and designated committees. It serves as a centralized directory of barangay personnel and their respective responsibilities.

Organizational Chart Page: Displays the barangay's organizational structure, showing the Punong Barangay, active Barangay Kagawads, Secretary, Treasurer, and other officials in a visual hierarchical chart. It allows administrators to organize and manage the arrangement of barangay officials and their respective positions.

Reports Page: Provides comprehensive reporting and filtering of barangay population data based on categories such as sex, purok, PWD, senior citizens, and other demographic information. It also allows personnel to generate, view, and print transaction reports for documentation, monitoring, and record-keeping purposes.
